

[ADJUSTABLE LIGHT CONVERGING DEVICE]

Abstract of Disclosure

A light converging device for a light source, which is suitable for use in an optical scan module. The light source has at least a lamp, while the light converging device has a lamp holder and an adjusting member. The lamp holder has an arc notch for holding the lamp, and the curvature of the arc notch can be adjusted freely. The *adjusting member* is mounted on the lamp holder for adjusting the curvature of the lamp holder.
